

SKILLS

- Python (Programming Language)
- Django (framework)
- ORM
- Django REST API
- Pandas
- NumPy
- Database: MySQL, SQLite3
- LLM (RAG, LangChain, Agentic AI, HuggingFace, Ollama, Gradio, Chroma, QLoRA, Modal, Multi-Agent System)
- AWS (IAM, EC2, EBS, S3, ASG, RDS, Route 53, VPC, SDK, CloudFront, Lambda)
- HTML, CSS, JS, React, and Jest
- Docker, Kubernetes, and Linux
- GIT
- Verum (data source tool)
- Prime (Task creation tool)
- Postman
- Dev Shell
- Unit test framework
- Jules (CI/CD)
- Confluence
- Jupyter Notebook
- Jira (Ticket Assignee Board)
- IDEs: PyCharm, MySQL Workbench, and VS Code
- Agile methodologies

SUMMARY

Python Backend Developer with **6.4 years** of relevant experience in backend development and **7.4 years** of total IT experience. Skilled in Python Django and the MVT architecture, delivering efficient, scalable solutions. Known for a proactive approach, problem-solving skills, and success in fast-paced, deadline-driven environments. Team-oriented with a strong focus on maintainability and performance in web applications.

EXPERIENCE

12/2024 - 05/2026

Sr. Infra Developer

Cognizant Technology Solutions, JP Morgan(Client) |
Hyderabad, India

- The Piscataway project is a platform project that is used to handle the data centres of Ashburn and Piscataway.
- I worked on developing the Flask applications for Hartonworks and VAPVSI servers.
- I worked on DR (Disaster Recovery) and SR (System Resiliency) activities, which involved switching the primary server to the secondary and vice versa.
- Worked on the migration of Tableau and Control-M jobs, and tracked the data and jobs that are running.
- Worked on GitHub code migration from Bitbucket to GitHub.

08/2022 - 12/2024

Sr. Infra Developer

Cognizant Technology Solutions , JP Morgan(Client) |
Hyderabad, India

- The Decom Automation Tool web application is used to decommission assets such as OS full servers, databases, web servers, backup systems, SAN storage, NAS storage, non-servers, and distributed servers from different lines of business.
- We generate work orders to identify what should be removed, such as AD, EPV, Keon, Backup, DB, NAS, Web, Scheduled Jobs, Remove lpar, VM delete, etc. by using the Snow (ServiceNow) tool.

Bachelor of Technology:
Electronics and
Communications Engineering

• Percentage: 68.2%

2014
Board of Intermediate
Education AP | Mangalagiri,
AP
Intermidaitaite : MPC

• Percentage: 84.2%

2012
Board of Secondary
Education AP | Pedaparimi
Board of Secondary Education

• CGPA: 8.5 / 10

CERTIFICATIONS

- Accenture ACE award.
- Accenture Star award.

PERSONAL
INFORMATION

Date of birth: 10/06/1996
Nationality: Indian
Marital status: Unmarried
Gender: Male

- Designed and implemented RESTful APIs, MVT architecture, and CRUD functionalities using Django and SQLite, enabling seamless integration with downstream systems.
- Led logical decommissioning workflows by processing enterprise asset data from Verum and managing the complete order lifecycle from creation to closure.
- Integrated and migrated work order generation processes to ServiceNow (SNOW), automating task-based asset retirement activities across multiple business units.
- Collaborated with cross-functional teams in Agile environments to deliver enhancements, resolve defects, perform testing, and maintain application stability and performance.

01/2019 - 08/2022
Software Engineer
Accenture | Hyderabad, India

- MD Survey and AIL CAL are survey applications for the Managers and Senior Managing Directors, which are available internally to the Accenture.
- It has policy sections for the Managers to respond to their feedback, and the user will get the certificate upon completing it.
- In these projects, we were using the Django framework and sqlite3 database to perform the server-side operations and maintain the business logic in the Views file, to connect the MySQL database to maintain the data, and Templates to render the data to the user.

LLM/RAG/AGENTIC AI PROJECTS

- **AI Coding Agent Platform** (Built an autonomous AI-powered coding assistant with codebase understanding, multi-agent workflows, GitHub integration, and intelligent code generation capabilities.)
- **Enterprise RAG Platform** (Developed an enterprise knowledge assistant enabling intelligent document search, citation-based responses, hybrid retrieval, and secure multi-user access.)
- **AI Cinematic Video Generation Platform** (Created an end-to-end AI video generation system that transforms text scripts into cinematic videos using open-source generative AI models.)
- **AI Interview Preparation System** (Built an AI-driven interview platform featuring resume analysis, mock interviews, voice interactions, and automated candidate performance evaluation.)
- **AI Security & Face Recognition Attendance System** (Developed a real-time facial recognition attendance and security platform with liveness detection, anti-spoofing, analytics, and edge AI deployment support.)
